Profile

I'm a FullStack developer from Valle University with four years of experience in software development for the technology sector. I'm looking to collaborate in a position as an application developer since I have experience in different web and mobile projects.

I have skills for cooperative and team work, I'm proactive, responsible and with fast learning ability. Interested in the development of web applications, mobile app and project management.

+57 (5) 385-1980

Development for web and mobile with international clients projects

February 2019 - September 2019
Development Engineer
CETOCO SAS
3187348993

Development for web and mobile applications

August 2016 - February 2019
Development Engineer
ADATEC
3707777

Development and implementation for web and mobile applications

September 2015 – August 2016
Development Engineer
ARQUITECSOFT
3797724

Development and implementation of the new requirements requested for the application

Education

2016
Information Systems Engineering
VALLE UNIVERSITY - CALI

8. Semester - August - December 2014

2010
Secondary education
TULIO ENRIQUE TASCÓN - BUGA

Engineering Stacks

PROGRAMMING:

ES6, JavaScript, TypeScript, React, React Native, Redux, C#, C++, PHP, .NET

FRAMEWORKS:

Angular, Ionic, AngularJS, Vue, NodeJS, Visual Studio, YII, Laravel, JDeveloper, Yeoman, Joomla, Wordpress, PrestaShop

VERSION CONTROL:

Git, Bitbucket, SVN

KNOWLEDGE:

Movil, Frontend, Backend, relational databases, non-relational databases

HOBBIES

COURSES

- English (High intermediate B1+) – Centro Cultural Colombo Americano
- React JS + redux + ES6 - Udemy
- Vue JS + Firebase - Udemy
- Angular - Udemy
- Information security - Icesi University
- Basic Programming - Platzi
- Programming Websites with HTML and JAVASCRIPT – Sena Virtual
- Computer Design of databases in SQL – Sena Virtual
- Computer architecture – Sena Virtual
- C++ – Sena Virtual
- MicrosoftOffice and OpenOffice

Projects

- Portfolio Web with GitHub Pages *http://betancourtyeison.github.io/*
- Angular applications
- Vue JS applications
- React applications
- Websites with Responsive Design
- Java applications like Sodoku and LunarLand
- Refrastrabe company Guacari Valle http://refrastrabe.com/
- Refratek company http://refratek.com/

Experiences

- With python + django I have created an app had to save all the data from different companies like their employees, orders, polls and more things and these information were used to be displayed in a CMS and application mobile.
- With MySQL I had to create the queries that we needed to get data like the orders that were for some specific users.
- With reactjs I have created a crud to save the info of a hospital connecting Firebase and other technologies.
- With react native I have created an application like an e-commerce to buy different products using a wallet that is recharged with payment methods and one more thing is that I used typescript in that project
- Years of experiences with Python: 2-3 years
- Years of experiences with Node and NoSQL: 4 years
- Years of experiences with React and React Native: 4 years
